Foreword

Trinity's Integrated Skills in English (ISE) exam assesses all four language skills – reading, writing, speaking and listening. In the two modules of the exam the skills are tested both individually and together. This integrated approach reflects how skills are used together in real-life situations.

This guide gives you a detailed overview of the two modules of the ISE Foundation exam – Reading & Writing and Speaking & Listening – and includes a sample exam paper and the rating scales for the level. For classroom activities to help prepare your students for ISE III, as well as the qualification specifications, see trinitycollege.com/ISEIII

Please check trinitycollege.com/ISE for the latest information about Trinity's ISE exams, and to make sure you are using the latest version of the related documents. Trinity's regulations can be found on our website, and policies are at trinitycollege.com/policies

Please note that ISE IV has a different format to ISE Foundation, I, II and III – see trinitycollege.com/ISEIV for details.

ISE III Reading & Writing exam

Overview of the ISE Reading & Writing exam

Trinity's ISE Reading & Writing exam tests reading and writing skills through an integrated approach. The integrated skills approach mirrors how we use reading and writing skills both together and separately in our studies and work. The reading texts reflect the range of subjects a student may encounter in an educational or academic setting and the way that he or she needs to find, select and report relevant and appropriate information. The writing tasks reflect the kind of activities a student does in a school or college context, such as essay writing. In the exam, candidates may highlight parts of the texts or questions with highlighter pens, reflecting how many students gather information in real-life.

The purpose of the exam is to assess a candidate's skills in reading and writing in the English language through tasks which correspond to his or her real-life activity and reason for learning English.

The ISE Reading & Writing exam is currently offered at four levels of the Common European Framework of Reference (CEFR) from A2 to C1.

Who is ISE Reading & Writing for?

The intended candidates are young people or adults who use English as a second or foreign language as part of their studies in order to develop their skills and improve their knowledge in a range of subject areas.

Candidates at the lower levels of the exam (ISE Foundation and ISE I), are generally young people or adults in school or college who are taking ISE as evidence to progress to a higher level of English study within their mainstream or English language school. The higher levels of the exam (ISE II and ISE III), are appropriate for young people or adults preparing for further or higher education who are required to prove their English language proficiency levels within an educational context. ISE qualifications are also accepted by UK Visas and Immigration (UKVI) as evidence of English language proficiency.

Introduction to ISE Reading & Writing tasks at ISE III

The Reading & Writing exam consists of four tasks.

Task 1 is the Long reading task, where the candidate reads a single text and answers 15 questions. The aims of this task are to understand:

- ▶ the main idea of a paragraph or text
- ▶ specific information at sentence, phrase and word levels.

Task 2 is the Multi-text reading task, where the candidate reads four texts and answers 15 questions. The aims of this task are to:

- ▶ understand the main idea of a paragraph or text
- ▶ understand specific information at sentence, phrase and word levels
- ▶ find specific information in different texts in order to create a text summary.

Task 3 is the Reading into writing task, where the candidate produces a piece of writing based on the four texts in task 2.

Task 4 is the Extended writing task, where the candidate produces a piece of writing in response to a prompt.

Candidate profile

Reading (tasks 1 and 2)

A candidate who passes ISE III Reading can:

- ▶ understand in detail lengthy, complex texts, whether or not they relate to his or her own area of speciality, provided he or she can reread difficult sections
- ▶ understand in detail a wide range of complex texts likely to be encountered in social, professional or academic life, identifying finer points of detail including attitudes, and implied as well as stated opinions
- ▶ use contextual, grammatical and lexical cues to infer attitude, mood and intentions and anticipate what will come next
- ▶ summarise long, demanding texts.

In tasks 1 and 2, the candidate is assessed on his or her ability to read across several texts and demonstrate a range of reading skills including skimming, scanning, reading for gist and detail, and inferring, summarising and evaluating.

Reading into writing (task 3)

A candidate who passes ISE III Task 3 – Reading into writing can:

- ▶ identify connections and themes between four texts in task 2
- ▶ identify information from the texts in task 2 that is relevant to task 3
- ▶ synthesise the information in task 2 to produce an elaborated response with clarity and precision in task 3.

Writing (tasks 3 and 4)

A candidate who passes ISE III Writing can:

- ▶ express himself or herself with clarity and precision, relating to the addressee flexibly and effectively
- ▶ write clear, detailed and well-structured descriptions and imaginative texts on complex subjects, underlining the relevant issues, in an assured style appropriate to the reader in mind
- ▶ expand and support points of view at some length with subsidiary points, reasons and relevant examples, and rounding off with an appropriate conclusion.

This profile is based on the level C1, Proficient User, of the Council of Europe's Common European Framework of Reference (CEFR).

ISE III Speaking & Listening exam

Overview of the ISE Speaking & Listening exam

ISE Speaking & Listening exams are communicative and performance-based exams which assess speaking and listening skills through an integrated approach. The integrated skills approach reflects how we use listening and speaking skills both together and separately in our studies and work. The integrated speaking and listening tasks reflect the kind of activities a student does at school, college or university. Additionally, the Independent listening tasks reflect the way that a student finds, selects and reports relevant and appropriate information in an educational or academic setting.

The purpose of the exam is to assess a candidate's English language skills in speaking and listening through tasks which correspond to his or her real-life activities and reasons for learning English.

The ISE Speaking & Listening exam is currently offered at four levels of the Common European Framework of Reference (CEFR) from A2 to C1.

Who is ISE Speaking & Listening for?

The intended candidates are young people or adults who use English as a second or foreign language as part of their studies in order to develop their skills and improve their knowledge in a range of subject areas.

Candidates at the lower levels of the exam (ISE Foundation and ISE I), are generally young people or adults in school or college who are taking ISE as evidence to progress to a higher level of English study within their mainstream or English language school. The higher levels of the exam (ISE II and ISE III), are appropriate for young people or adults preparing for further or higher education who are required to prove their English language proficiency levels within an educational context. ISE qualifications are also accepted by UK Visas and Immigration (UKVI) as evidence of English language proficiency.

Introduction to ISE Speaking & Listening tasks

The Speaking & Listening exam consists of several tasks and increases in length as the level increases. The table below shows the progression across the levels.

	ISE Foundation	ISE I	ISE II	ISE III
CEFR level	A2	B1	B2	C1
Total exam time	13 minutes	18 minutes	20 minutes	25 minutes
Topic task	4 minutes	4 minutes	4 minutes	8 minutes
Collaborative task	–	–	4 minutes	4 minutes
Conversation task	2 minutes	2 minutes	2 minutes	3 minutes
Independent listening task	6 minutes	10 minutes	8 minutes	8 minutes
Examiner administration time	1 minute	2 minutes	2 minutes	2 minutes

The Topic task

What is the formal topic presentation?

Before the exam, the candidate prepares a topic of his or her own choice to formally present to the examiner, in an uninterrupted presentation of up to four minutes. The Topic task provides the candidate with the opportunity to talk about a topic which is of personal interest or relevance to him or her and which he or she feels confident about. This task gives the candidate some degree of autonomy and control over the content of the presentation and discussion.

What language skills can the candidate demonstrate in the topic presentation?

The presentation provides the candidate with the opportunity to show he or she can:

- ▶ present a discursive topic with different points of view and sub-themes
- ▶ construct, present and develop an argument, and expand and support points of view at some length
- ▶ use the language functions of ISE III (see page 40).

What is the formal topic discussion?

After the presentation the candidate asks the examiner if they have any questions or comments about the ideas discussed in the presentation. The examiner and candidate then have a discussion, which will last up to four minutes.

What language skills can the candidate demonstrate in the topic discussion?

The candidate can:

- ▶ initiate and maintain the discussion, not just respond to the examiner's questions and observations
- ▶ engage in a one-to-one, unscripted discussion with an expert speaker of English
- ▶ use the language functions of ISE III (see page 40).

Can the candidate bring notes with them?

In the ISE III exam the candidate must prepare a formal handout to go with their formal topic presentation. The candidate gives the handout to the examiner. The candidate can prepare brief notes for themselves to use in their presentation. However, written scripts are not permitted.

Level	Support
ISE Foundation	Topic form with four points, plus optional small item
ISE I	Topic form with four points, plus optional small item
ISE II	Candidate may use notes or a mind map and may bring a small item
ISE III	Formal handout must accompany the presentation

The Collaborative task

What happens in the Collaborative task?

The examiner reads the candidate a prompt. The candidate responds to the prompt by starting, leading and maintaining the interaction. For example, the candidate can ask questions to find out more information, respond to information and comments from the examiner and demonstrate skills in turn-taking. It is essential for the candidate to initiate, interact and collaborate with the examiner. The candidate should not wait for the examiner to lead the conversation, and monologues from the candidate will receive a low mark.

What is the examiner's prompt?

The prompt presents a dilemma or opinion. The candidate then needs to take the initiative to find out more about the background of the examiner's circumstances or position and engage the examiner in a sustained discussion about his or her circumstances or views. All of the examiner's prompts are prepared in advance by Trinity.

What language skills can the candidate demonstrate in the Collaborative task?

The task provides the opportunity for the candidate to demonstrate his or her ability to take control through the use of questioning techniques and language functions such as requesting information and clarification. This task allows the candidate to show that they can initiate 'turns' and control the direction of the interaction. The Collaborative task produces an authentic exchange of information and opinions, with the language functions listed at ISE III arising naturally from the interaction. The language functions for ISE III are on page 40.

The Conversation task

What is the Conversation task?

The Conversation task is a meaningful and authentic exchange of information, ideas and opinions. It is not a formal 'question and answer' interview. In this task, the examiner selects one subject area for discussion with the candidate.

What are the possible subjects for discussion?

The subject areas have been carefully selected to offer a progression from the 'concrete' subjects at ISE Foundation to the 'abstract' at ISE III. For the subject areas for the Conversation task at ISE III, please see page 23.

What does the interaction in the Conversation task involve?

The examiner asks a question or makes a comment to start the conversation but the candidate is expected to take responsibility for initiating and maintaining the conversation. At ISE III, the candidate is expected to lead the conversation to explore the issue with the examiner.

The Independent listening task

What is the Independent listening task?

Listening skills are tested in an integrated way together with speaking skills in the Topic task, Collaborative task and Conversation task. In the Independent listening task the candidate has the opportunity to demonstrate the kind of listening skills that are required in lessons and lectures. The candidate listens to a recording and talks about the content of the recording.

What is the procedure for the Independent listening task?

The examiner plays an audio recording. The candidate listens once and the examiner asks the candidate to say in one or two sentences what the recording was about. The examiner then asks the candidate a question that requires listening for detail. The examiner plays the recording for a second time, and then asks the question again. The candidate responds orally, and has one minute to talk. Candidates may take notes while they are listening for the second time. Notes are optional and are not assessed.

Glossary of speaking aims for ISE III

Communicative effectiveness	<ul style="list-style-type: none"> ▶ Responding appropriately to interaction ▶ Initiating and maintaining conversation

Candidate profile

Speaking

A candidate who passes ISE III Speaking can:

- ▶ express himself or herself fluently and spontaneously, almost effortlessly – only a conceptually difficult subject hinders a natural, smooth flow of language
- ▶ readily overcome gaps with circumlocutions – there is little obvious searching for expressions or avoidance strategies and only a conceptually difficult subject hinders a natural, smooth flow of language
- ▶ use language flexibly and effectively for social purposes, including emotional, allusive and joking usage
- ▶ argue a formal position convincingly, responding to questions and comments and answering complex lines of counter argument fluently, spontaneously and appropriately
- ▶ give clear, detailed descriptions on complex subjects, integrating sub-themes, developing particular points and rounding off with an appropriate conclusion
- ▶ give elaborate descriptions and narratives, integrating sub-themes, developing particular points and rounding off with an appropriate conclusion
- ▶ give a clear, well-structured presentation of a complex subject, expanding and supporting points of view at some length with subsidiary points, reasons and relevant examples
- ▶ select a suitable phrase from a readily available range of discourse functions to preface his or her remarks appropriately in order to get the floor, or to gain time and keep the floor while thinking
- ▶ produce clear, smoothly flowing, well-structured speech, showing controlled use of organisational patterns, connectors and cohesive devices
- ▶ qualify opinions and statements precisely in relation to degrees of, for example, certainty/uncertainty, belief/doubt, likelihood, etc.

Listening

A candidate who passes ISE III Listening can:

- ▶ understand enough to follow extended speech on abstract and complex topics beyond his or her own field, though he or she may need to confirm occasional details, especially if the accent is unfamiliar
- ▶ recognise a wide range of idiomatic expressions and colloquialisms, appreciating register shifts
- ▶ follow most lectures, discussions and debates with relative ease
- ▶ understand a wide range of recorded and broadcast audio material, including some non-standard usage, and identify finer points of detail including implicit attitudes and relationships between speakers
- ▶ understand in detail speech on abstract and complex topics of a specialist nature beyond his or her own field, though he or she may need to confirm occasional details, especially if the accent is unfamiliar
- ▶ use contextual, grammatical and lexical cues to infer attitude, mood and intentions and anticipate what will come next.

This profile is based on the level C1, Proficient User, of the Council of Europe's Common European Framework of Reference (CEFR).

Examiner role	The examiner reads a prompt presenting a dilemma or opinion. The examiner responds naturally to the candidate's questioning and comments to encourage him or her to keep the conversation going. The examiner will not give away too much information in one turn, or restrict information unnaturally.
Assessment	<p>The Collaborative task, Topic task and Conversation task are given one score using four criteria:</p> <ul style="list-style-type: none"> ▶ Communicative effectiveness ▶ Interactive listening ▶ Language control ▶ Delivery <p>Please see the Speaking and listening rating scale (appendix 6) for the full performance descriptors for each criterion and level of performance.</p>

Conversation task

Task	The Conversation task is an integrated speaking and listening task. The examiner selects one conversation subject area from the list given below and asks the candidate a question or makes a comment to start the conversation.
Timing	3 minutes
Language functions	<ul style="list-style-type: none"> ▶ Developing and justifying an argument ▶ Summarising ▶ Evaluating options, past actions/course of events, different standpoints ▶ Deducing and inferring ▶ Staging ▶ Hypothesising ▶ Indicating understanding of points made by examiner ▶ Establishing common ground/purpose or strategy
Examiner role	The examiner uses the list of subject areas and his or her own test plans to ask questions and elicit the target language functions of the level.

Independent listening task

Task	During this task, the candidate listens to a recorded monologue twice. The first time, the examiner asks for the gist of the recording. The second time, the examiner asks a question that requires listening for detail. The examiner asks the question both before and after playing the audio recording, and the candidate responds orally after listening. The candidate may take notes while he or she is listening for the second time. Notes are optional and are not assessed.
Timing	8 minutes
Task focus	<ul style="list-style-type: none"> ▶ Showing ability to place information in a wider context, clearly distinguishing main and subordinate points ▶ Recognising the speaker's line of argument ▶ Inferring information and links between points of information that are not expressed explicitly ▶ Interpreting speaker's attitude ▶ Inferring meaning of unfamiliar words
Examiner role	The examiner plays the recording, reads the instructions and asks questions, including a gist question and a more detailed question. Neither the instructions nor the question can be repeated.
Assessment	<p>This task is assessed using a rating scale of 0-4. The number of relevant points and supporting details reported correctly is taken into account as well as the promptness with which the candidate responds.</p> <p>Please see the Independent listening rating scale (appendix 7) for more detail.</p>

ISE III

Integrated Skills in English III

Time allowed: 2 hours

This exam paper has four tasks. Complete all tasks.

Task 1 – Long reading

Read the following text about languages and answer the 15 questions on page 3.

Paragraph 1

The writer and Professor of Linguistics David Crystal relates the experience of a fellow linguist called Bruce Connell, who was doing some research in West Africa in the 1990s when he discovered a language that had never been studied before. The problem was that there was only one man left who spoke it. Connell was too busy to investigate further, so resolved to return the following year. By the time he got back, the man had died, and of course the language along with him. One day it existed, the next day it was extinct.

Paragraph 2

In itself, this story is not all that surprising: languages have been dying out (and new ones emerging) for as long as humans have been on the earth. More alarming is the current rate of language extinction. Professor Crystal, who has written a book called 'Language Death' as part of his campaign to raise awareness of the problem, estimates that of approximately 6,000 languages in the world, around half will disappear over the next 100 years. This means that's one language less every couple of weeks. As for endangered languages, it has been estimated that there are nearly 500 with only one speaker left, and over 3,000 with 10,000 speakers or fewer.

Paragraph 3

Does this matter? I confess that until I looked into it, I thought of this situation (if I thought about it at all) as just natural evolution. Languages come and go according to whether they meet the needs of the speakers, and of all the world's problems, this is nowhere near the most pressing. Professor Crystal, though, offers a number of reasons why we should care. Languages, he says, are interesting in themselves and teach us about language and communication in general. They contain the culture and history of those who speak them, and are a vital part of group identity. A further and more abstract argument is that diversity is necessary for evolution, or even survival, just as much in cultural terms as in biology. Speaking personally, I must say these arguments haven't converted me into a campaigner for endangered languages, but at least I'm grateful that there are people like David Crystal doing their best to keep the issue alive.

Paragraph 4

There are various reasons why languages die, including the obvious one of populations disappearing as a result of natural disasters or war, but the most common one is a gradual cultural assimilation. When one culture dominates another, there is pressure on people to adopt the dominant language. What usually happens is that, after some time, most people begin to speak both languages. This phase, however, tends to lead to a gradual decline in the 'dominated' language as younger generations stop speaking it. From then on, basic population changes take over as its surviving speakers become fewer and fewer. Later generations may look back with regret and realise that something valuable has been lost, but by then of course it's too late.

Paragraph 5

So, if we accept that disappearing languages is an important problem, can anything be done? Unsurprisingly, David Crystal is convinced that steps can be taken (and furthermore have been successful in various places). He cites examples from around the world, including the revival of Welsh, which was the result of deliberate policy decisions. Favourable conditions, however, must be in place, not least of which is the desire and willingness of the community to save their language. In cases where this doesn't exist, any efforts that are made will be doomed to failure. Beyond that, a threatened language needs to have prestige, which requires that it should be given a place in the education system and, in most cases, an agreed grammar and preferably a written form (if it doesn't already have one). None of this is cheap. One estimate is that there would be an annual cost of £40,000 per language. But when you compare that to the amount spent in other areas, perhaps it's not so much after all.

page 2

This exam paper has four tasks. Complete all tasks.

Questions 1-5

The text on page 2 has five paragraphs (1-5). Choose the best title for each paragraph from A-F below and **write the letter (A-F) on the lines below**. There is one more title than you need.

- 1. Paragraph 1
- 2. Paragraph 2
- 3. Paragraph 3
- 4. Paragraph 4
- 5. Paragraph 5

- A Why disappearing languages is a big issue
- B How a language becomes dominant
- C How languages can be rescued
- D A story of a lost language
- E Rate of language extinction
- F Typical process of language extinction

Questions 6-10

Choose the **five statements** from A-H below that are **TRUE** according to the information given in the text on page 2. **Write the letters of the TRUE statements on the lines below (in any order)**.

- 6.
- 7.
- 8.
- 9.
- 10.

- A The decline in world languages will slow down in the future.
- B The writer is now convinced that he should help to make people aware of the issue.
- C People tend to give a language more respect if it is taught in schools.
- D Languages are always dying out and new ones are born.
- E Some languages are lost along with the people because of natural disasters.
- F A researcher who returned to study a 'new' language found there were no speakers left.
- G The writer used to think that language death was not a problem.
- H It's thought that 3,000 languages will disappear in a century.

Questions 11-15

Complete sentences 11-15 with an exact number, word or phrase (maximum three words) from the text. **Write the exact number, word or phrase on the lines below**.

- 11. The writer's view was that the survival of languages depends on if they of people.
- 12. According to Professor Crystal, the of languages is necessary for evolution and survival.
- 13. Typically, after a period of bilingualism, one language will suffer
- 14. Attempts to save a language are without commitment from the people who speak it.
- 15. A language will be easier to save if it can be down.

Task 2 – Multi-text reading

In this section there are four short texts for you to read and some questions for you to answer.

Questions 16-20

Read questions 16-20 first and then read texts A, B, C and D below the questions.

As you read each text, decide which text each question refers to. **Choose one letter – A, B, C or D – and write it on the lines below.** You can use any letter more than once.

Which text would be most useful for someone who:

- 16. is thinking of getting involved in beekeeping?
- 17. has never seen inside a beehive before?
- 18. wants to understand the reasons why bees are in danger?
- 19. wants to learn more about the organisation of social insects?
- 20. is interested in myths and legends about bees?

Text A

The single queen lays up to 2,000 eggs a day.

The role of the drone is to mate with the queen. They can't sting, and when winter comes, they are driven out by workers to starve to death.

Most of the bees in a colony are 'workers'. They are females who collect nectar and pollen from flowers, and maintain and defend the hive.

We rely on pollination by honeybees and other species of bee for around one third of the food we grow.

The 'waggledance' communicates the distance and location of nectar to other bees.

Text B

The Great Bee Mystery

Beekeeper Jack Walsh opens the first hive and I look inside. 'You can see the workers have gone, but the queen and the honey are still there – other bees would normally steal that, but won't touch it in a CCD hive.'

CCD, or Colony Collapse Disorder, has wiped out over a third of the UK's hives, and some believe up to 70% could be threatened. The phenomenon involves the sudden abandonment of a hive, and is yet to be explained, although, as Dr Karen Marsh at the University of London told me, various theories are being examined: 'The chief suspect is the varroa mite,

a tiny parasite which sucks the bees' blood and carries a number of diseases. However, to stay healthy, bees also need a varied diet, but nowadays many farms grow just one crop. Plus, some pesticides may interfere with the bees' navigation system. The only consensus is that a number of factors play a role.'

Jack Walsh blames modern methods: 'We need to get back to basics, so no more antibiotics, or transporting bees hundreds of miles for pollination.'

Text C

Bees in folklore – What traditions have you heard?

Joe: My granddad told me bees can recognise their beekeeper!

Alex: Here they say that if someone in the family gets married, you have to ‘tell the bees’ and leave them some wedding cake, or they’ll get annoyed.

Luis: Because honey was the main sweet food in the old days, quite a few cultures say bees originated with the gods.

Helen: @Alex – Yes, but the same goes for bad news – they like to feel part of the family!

Rashid: I’ve heard they don’t sting at night. Is it true?

Silvio: @Joe – Tell him it’s not just an old wives’ tale – there’s research that says they might be able to tell faces apart.

Silvio: @Rashid – No, they’ll sting you any time if they’re threatened.

Benjamin: @Alex – I read that they’ve always been seen as a model for a good family – the way they all play their part and work hard and all that. So I suppose the belief is that if you include them in your family, that’ll be harmonious too.

Text D

The Newbie Beekeeper’s blog 10 December

Starting out

After studying a few books, I bought my first hive – a new one (it’s best to avoid second-hand ones because of risk of disease) – and a small colony of workers with a queen. I found a second-hand veil and jacket, and a cheap smoker for calming down the bees before opening the hive – the smoke makes them think they need to evacuate the hive, so they quickly eat as much honey as they can, which makes them sleepy and slow. A local farmer was happy to have the hive on his land as long as it was away from his horses, as for some reason bees don’t like them.

I got stung a lot more than I expected at first, until an experienced beekeeper watched me open the hive, and advised me to keep my movements much more calm and gentle. Oh, and to zip up my veil all the way – I learnt that lesson the hard way!

Questions 21-25

Choose the **five statements** from A-H below that are **TRUE** according to the information given in the texts above. **Write the letters of the TRUE statements on the lines below (in any order).**

- | | |
|----------|--|
| 21. | A There is an old tradition that you should share news of the family with the bees. |
| 22. | B Research studies have shown that bees only sting people during the daytime. |
| 23. | C A certain proportion of the beehive colony will not survive from one year to another. |
| 24. | D The spread of CCD risks causing a major problem for the UK’s farm and food production. |
| 25. | E The smell that the bee colony produces is determined by the specific flowers which they visit. |
| | F More research is needed to confirm whether the varroa mite is the main cause of CCD. |
| | G Anecdotal and scientific evidence suggest bees can recognise human facial features. |
| | H CCD means that beehives now have to be moved around the country for pollination. |

Questions 26-30

The summary notes below contain information from the texts on pages 4 and 5. Find an exact number, word or phrase (maximum three words) from texts A-D to complete the missing information in gaps 26-30.

Write the exact number, word or phrase on the lines below.

Summary notes

How to keep bees

Essential equipment needed:

- A beehive, ideally a (26.) one
- A bee colony, including (27.)
- Suitable protective clothing, ie (28.)
- An instrument for calming the bees, ie a smoker

Choice of location:

- On a piece of land near nectar-bearing plants, eg flowers, crops
- At a safe distance from other animals, eg (29.)

Other considerations:

- Keeping the hive healthy, ie ensuring a varied diet and avoiding (30.)
- Getting advice from experienced beekeepers
- Keeping up-to-date with the latest research

Task 3 – Reading into writing

Use the information you read in Task 2 (pages 4-6) to write an article (200-230 words) for a general interest science magazine about the relationship between honeybees and humans.

You should plan your article **before** you start writing. Think about what you want to say and make some notes to help you in this box:

Planning notes

(No marks are given for these planning notes)

Now write your article of 200-230 words on the lines below. Try to use your own words as far as possible – don't just copy sentences from the reading texts.

Task 4 – Extended writing

Write an essay (200–230 words) giving your opinions on the topic:

‘When studying the past, it’s more important to know about ordinary people than famous people. Do you agree?’

You should plan your essay **before** you start writing. Think about what you want to say and make some notes to help you in this box:

Now write your essay of 200–230 words on the lines below.

ISE III

A series of 20 horizontal dotted lines for writing an essay.

When you have finished your essay, spend 2-3 minutes reading through what you have written. Make sure you have answered the task completely and remember to check the language and organisation of your writing.

Sample Independent listening task

Examiner rubric

You're going to hear part of a radio programme about routine. You will hear the talk twice. The first time, just listen. Then I'll ask you to tell me generally what the speaker is talking about. Are you ready?

Now can you tell me in one or two sentences what the speaker was talking about?

Now listen to the talk again. This time make some notes as you listen, if you want to. Then I'll ask you to tell me the different ways the speaker evaluates the need for routine in our lives and whether you think he comes to a conclusion. Are you ready?

Now tell me the different ways the speaker evaluates the need for routine in our lives and whether you think he comes to a conclusion. I'll stop you after one minute.

Audio script for Independent listening task

In my recent book, I discuss the subject of routine and the effects it has on our lives. Actually, my original idea was to look at the working methods of successful creative people like writers and artists to see if there were any helpful lessons to be drawn. The more people I examined, the clearer it became that there was one thing the vast majority of them had in common: they had a regular working routine and stuck to it strictly, even obsessively. Their habits and routines often ended up being more like rituals. To take one example, the composer Beethoven apparently used to start each day with a cup of strong coffee made with exactly 60 coffee beans, which he insisted on counting out personally. And that's by no means the oddest ritual I discovered.

Obviously we don't all have to behave like that, but it does appear that routine is something most of us need. Most humans function better when they have some kind of structure to their lives. In fact, without routines for day-to-day activities, nothing much would get done. Transport wouldn't run on time, schools and workplaces would be in a permanent state of chaos, and so on.

So, society as a whole seems to favour, or even require, people with regular lifestyles. But there's a growing body of research suggesting that too much routine is bad for personal well-being, and it's this aspect that much of the book is concerned with. Breaking up your routine and doing something new, it appears, increases your happiness. It's not just a case of getting bored: routine also increases our sense of time passing by too quickly. When nothing new is happening, we're not so conscious of events and simply don't notice the days and weeks slipping away.

There's also an interesting connection between time and memory, or more exactly two kinds of connection. Firstly, a lot of what people accept as naturally increasing forgetfulness as they get older is actually more to do with their lives becoming predictable. It's not so much that they forget things that have happened but that they didn't really notice them in the first place because they'd become so automatic. The other thing that strikes a chord with me as I get older is the explanation for why childhood memories seem so vivid. When you're young, everything is new and your brain is working overtime to take everything in, so your impressions of events are much more memorable. What we need to do is to try and recapture that sense of newness by disrupting routines and actively seeking out new experiences.

Answers

Gist: Routine is beneficial to some extent. But it is important to break routine and try new things for happiness and memory (any broadly similar formulation acceptable).

- ▶ Successful people known to have routine, for example, Beethoven
- ▶ Not always healthy though – can become like a ritual
- ▶ Some routine is vital – transport, schools, etc
- ▶ Also, people seem to need some routine to give structure to lives
- ▶ Society needs people to have routine
- ▶ BUT – doing new things is important for happiness/well-being – it means time doesn't seem to pass so quickly
- ▶ Also, newness is important for forming and maintaining memory – memory loss in older age can be due to predictability
- ▶ Conclusion: Speaker appears to conclude that a degree of routine is important for individuals and society as a whole but that it is very important to avoid becoming too predictable

Appendix 3 – Language functions for ISE III

Language functions

- ▶ Developing and justifying an argument
- ▶ Summarising
- ▶ Evaluating options, past actions/course of events, different standpoints
- ▶ Deducing and inferring
- ▶ Staging
- ▶ Hypothesising
- ▶ Indicating understanding of points made by examiner
- ▶ Establishing common ground/purpose or strategy

Please note that the language functions are cumulative through the ISE levels.

There are no suggested grammar structures for ISE III. Candidates are expected to use a broad range of complex structures to express thoughts clearly.
