Using data to plan learning goals (14:01)

Now watch the next section of the video on using data to plan learning goals and answer the questions below.

What do teachers need to raise their students' awareness of?
1
1
2
Apart from the students' needs, what other factors do teachers need to bear in mind when planning their students' courses?
1
2
2
How can diagnostic assessments help the teacher?
3. Discussion points
In the final section of the video, Ben and Jason discuss how diagnostic assessments can not only help the teacher plan what to cover in the lessons but also help the teacher to determine what 'path' and what order they need to take.
Now think about how you use the data you collect from your students' diagnostic assessments. To
Now think about how you use the data you collect from your students' diagnostic assessments. To what extent do you use it to help determine the path you take with your students.
what extent do you use it to help determine the path you take with your students.

Consider these arguments against the use of diagnostic assessments:

- 1) There is little point in doing a diagnostic assessment as I cannot make any changes because I have to follow a prescribed syllabus.
- 2) Although I can learn about a lot of my students' individual needs, I cannot accommodate all of them.

To what extent do you agree and what are the counter-arguments to these?

4. Further learning
